

FOOTWEAR INVESTIGATIVE LEAD SEARCHES

Have a questioned footwear impression from a scene, but don't have a shoe standard for comparison?

Footwear impressions are left at 35% of crime scenes, but are often overlooked.

Footwear investigative lead searches can be used to provide agencies with possible makes & models of the shoe that could have left the impression behind at the scene.

If an outsole match is found, a report will be issued that includes images of possible outsole designs and uppers to aid in your investigation.

- Submit physical items of evidence or images on electronic storage media directly to the Laboratory

-OR-

- Submit digital images electronically via ShareFile or Email:
madevidence@doj.state.wi.us

All submissions must contain a Transmittal Form
