

## TOXICOLOGY REFERENCE LABORATORIES

**Scope:** The purpose of this document is to offer our customers a convenient list of private toxicology laboratories. The primary reason for this list is to address situations when the toxicology requests are outside the scope of the Crime Laboratory. The laboratories on this list have been assessed by recognized external bodies. This accreditation/certification process provides some quality assurance regarding the laboratory's work. Specific information regarding each laboratory's specific accreditation and/or certification(s) can be found on their webpages.

No laboratory endorsements are implied by this document. The Crime Laboratory recognizes other qualified reference laboratories do exist.
